Handbook: https://moodle.ucl.ac.uk/mod/book/view.php?id=7651062

Objectives: https://moodle.ucl.ac.uk/mod/resource/view.php?id=7651063

Readings: https://moodle.ucl.ac.uk/mod/book/view.php?id=7651064

Syllabus: https://moodle.ucl.ac.uk/mod/book/view.php?id=7651062&chapterid=207840#mod_book-chapter

Assessment: https://moodle.ucl.ac.uk/mod/book/view.php?id=7651062&chapterid=207841#mod_book-chapter

W1: https://moodle.ucl.ac.uk/course/section.php?id=1262637

W2: https://moodle.ucl.ac.uk/course/section.php?id=1262638

W3: https://moodle.ucl.ac.uk/course/section.php?id=1262639

W4: https://moodle.ucl.ac.uk/course/section.php?id=1351490

W5: https://moodle.ucl.ac.uk/course/section.php?id=1262640

W6: https://moodle.ucl.ac.uk/course/section.php?id=1262641

W7: https://moodle.ucl.ac.uk/course/section.php?id=1262643

W8: https://moodle.ucl.ac.uk/course/section.php?id=1262642

Lecture:

W1: https://moodle.ucl.ac.uk/mod/url/view.php?id=8184778

W2: https://moodle.ucl.ac.uk/mod/url/view.php?id=8184795

W3: No Lecture

W4: https://moodle.ucl.ac.uk/mod/url/view.php?id=8224510

W5: https://moodle.ucl.ac.uk/mod/url/view.php?id=8184806

W6: https://moodle.ucl.ac.uk/mod/url/view.php?id=8184812

W7: https://moodle.ucl.ac.uk/mod/url/view.php?id=8184877

W8: https://moodle.ucl.ac.uk/mod/url/view.php?id=8184871

Debate:

W1: "This house believes that the deployment of Learning Analytics and Artificial Intelligence is essential for advancing human learning, outweighing the potential ethical issues on privacy and autonomy."
https://moodle.ucl.ac.uk/mod/forum/view.php?id=7651115

W2: "This House believes that technology, as a medium itself, does not enhance learning. Do you agree?" https://moodle.ucl.ac.uk/mod/forum/view.php?id=7651121

W3: No Debate

W4: "This House believes that data-driven learning analytics have the potential to develop new learning theory or improve existing ones."
https://moodle.ucl.ac.uk/mod/forum/view.php?id=8224511

W5: **"This House believes that, in educational technology, the benefits of multimodal data outweigh its challenges."**
https://moodle.ucl.ac.uk/mod/forum/view.php?id=7651136

W6: **"This House Believes that technology is neutral."**
https://moodle.ucl.ac.uk/mod/forum/view.php?id=7651141

W7: "This House believes that all knowledge required for teaching and learning can be accurately represented by AI models acting as tutors."
https://moodle.ucl.ac.uk/mod/forum/view.php?id=7651151

W8: "This House believes that AI will revolutionise education, signalling the end of the traditional classroom.
"https://moodle.ucl.ac.uk/mod/forum/view.php?id=7651146

Reflection:

Reflection Guideline: https://moodle.ucl.ac.uk/mod/resource/view.php?id=7651069

Example Writing1: https://moodle.ucl.ac.uk/mod/resource/view.php?id=7651070

Example Writing2: https://moodle.ucl.ac.uk/mod/resource/view.php?id=7651071

Assessment:
https://moodle.ucl.ac.uk/mod/book/view.php?id=7651062&chapterid=207847#mod_book-chapter

W1: Questions "Reflect on your goals and expectations for this module. What do you hope to achieve, and how do you plan to engage with the content to meet your objectives?"

W2: Questions "What have you learned about the role of data as a key affordance of technology in supporting and enhancing learning? What did you learn from analysing your regression results, and how do these results show the impact of data on learning?"

W3: Reflect upon What are LLMs lecture you participated in this week.

W4: What is the relationship between learning theories, learning design, digital traces of data, and learning analytics? Practical: How has your experience with using data for predictions and applying classification algorithms influenced your understanding of the role of learning analytics?

W5: What are the promises and challenges of using multimodal data in learning technologies? What are the potential benefits and limitations of using advanced classification approaches (e.g. Random Forest and XgBoost) with multimodal data in educational contexts? Reflect upon the analytics feedback you received on different sections: individual feedback, group processes and group challenges/regulation.

W6: Building upon the prediction models you encountered in earlier weeks, what predictions do you plan to generate in your design case and how you will measure their value quantitatively? You can reflect on the model performance achieved in your design case. Drawing on your group's discussion of common critiques of the DUTE_AI Teacher Dashboard, which critiques or value-driven assumptions may also apply to your own design case?

W7: How can the concepts and techniques you've learned this week, such as NLP and generative AI be applied to enhance your design case and your practice? How have you engaged with this week's content, and what more can you do to deepen your understanding and application of these concepts?

W8: What problems do you think AI technology might help address in the context of learning and teaching? How has your understanding of different conceptualisations of AI evolved, and what are the potential implications for education in the short and long term? Reflect on your group's focus problem and the technologies you considered to solve it. Why did you select these technologies, and how do they relate to the different conceptualisations of AI?
